

Precautions for battery pack

- The battery pack is consumables. Repeated charging and discharging decreases battery life.
- Store the battery pack within the following temperature range. Failure to do so may lead to deterioration in performance.
 - *Battery pack storage temperature range:
 - 20°C ~ +50°C (if stored for less than 1 month)
 - 20°C ~ +40°C (if stored for less than 3 months)
 - 20°C ~ +20°C (if stored for less than 1 year)
- Do not use or store the battery pack at high temperature, such as in strong direct sunlight, in cars during hot weather. This may cause leakage of battery fluid.
- If you are not going to use the battery pack for a long period, charge the battery pack once every 6 months.
- If you are not going to use the splicer, remove the battery pack from the splicer.

When should the battery be replaced?

When the splice cycle decreases extremely with a fully charged battery, a new battery pack should be purchased.

When disposing of the battery pack, contact our maintenance service center or follow the local regulations.
